Run

```
1 class ConstructorExample {
2     int a, b;
3     ConstructorExample() {
4         a = 10;
5         b = 15;
6     }
7     ConstructorExample(int a, int b) {
8         this.a = a;
9         this.b = b;
10    }
11    void disp() {
12        System.out.println("a: " + a + ", b: " + b);
13    }
14    public static void main(String[] args) {
15        ConstructorExample obj1 = new ConstructorExample();
16        obj1.disp();
17        ConstructorExample obj2 = new ConstructorExample(20, 25);
18        obj2.disp();
19    }
20 }
```

Output

Clear

```
java -cp /tmp/Y02h5WLfmn/ConstructorExample
a: 10, b: 15
a: 20, b: 25

=== Code Execution Successful ===
```
